CONFIDENTIAL - FOR INTERNAL USE ONLY

1. 30-Second TL;DR

- The Energy sector has seen no recent M&A activity, attributed to market volatility, regulatory scrutiny, and strategic reevaluation.
- Oil prices are fluctuating due to geopolitical tensions, with Brent crude recently dropping 6.3% to \$85.87 a barrel.
- The average EV/EBITDA multiple for the Energy sector is 8.5x, with oil & gas at 6.3x and renewable energy at 15.1x, indicating a premium for growth sectors.

2. 1-Minute TL;DR

- Recent M&A activity in the Energy sector is stagnant, with no deals reported in the past week due to market volatility and regulatory challenges.
- Oil prices are under pressure, recently falling 6.3% to \$85.87 a barrel amid geopolitical tensions, particularly in the Middle East.
- The Energy sector's average EV/EBITDA multiple stands at 8.5x, with oil & gas at 6.3x and renewable energy commanding a higher multiple of 15.1x, reflecting investor interest in growth areas.
- The market is cautious, influenced by economic uncertainties and regulatory scrutiny, leading companies to focus more on organic growth strategies.

3. 2-Minute TL;DR

- The Energy sector has not seen any M&A deals recently, likely due to market volatility, increased regulatory scrutiny, and companies reassessing their strategic priorities amid evolving market conditions.
- Oil prices have been volatile, with Brent crude recently dropping 6.3% to \$85.87 a barrel, following a surge above \$100 due to geopolitical tensions in the Middle East, including missile strikes from Iran.
- The average EV/EBITDA multiple for the Energy sector is approximately 8.5x, with notable variations:

APAC Energy Sector M&A & Valuation TLDR - 2026-08-02

APAC Energy Sector

oil & gas at 6.3x, renewable energy at 15.1x, utilities at 12.8x, and solar & wind at 18.5x, indicating a premium for high-growth sectors.

- Market dynamics are influenced by geopolitical tensions, economic uncertainties, and regulatory challenges, prompting companies to prioritize organic growth over M&A.
- Investors should monitor geopolitical developments and consider diversifying portfolios across energy subsectors to mitigate risks associated with price volatility and economic uncertainty.
