CONFIDENTIAL - FOR INTERNAL USE ONLY

1. 30-Second TL;DR

- The Energy sector is facing volatility due to geopolitical tensions, particularly in the Middle East, causing oil prices to surge over 6%.
- The average EV/EBITDA multiple for the Energy sector is 8.5x, with oil and gas at 6.3x and renewable energy at 15.1x.
- Investors should focus on geopolitical risks and consider renewable investments, while companies in energy infrastructure may pursue strategic acquisitions.

2. 1-Minute TL;DR

- The Energy sector is currently impacted by geopolitical tensions, especially in the Middle East, leading to a 6% rise in oil prices, with Brent crude at \$78.80 per barrel.
- The average EV/EBITDA multiple for the sector stands at 8.5x, with oil and gas trading at 6.3x and renewable energy at a premium of 15.1x.
- Key drivers include rising oil prices and ongoing investments in renewables, while inflation concerns and regulatory challenges pose headwinds.
- Investors should monitor geopolitical developments and consider increasing exposure to renewable sectors, while energy infrastructure firms may explore acquisitions to enhance capabilities.

3. 2-Minute TL;DR

- The Energy sector is navigating a turbulent landscape marked by geopolitical tensions, particularly the recent escalation of conflict in the Middle East, which has driven oil prices up by over 6%. Brent crude now trades at \$78.80 per barrel, raising concerns about supply disruptions in critical shipping routes.
- The average EV/EBITDA multiple for the Energy sector is approximately 8.5x, with notable variations: oil and gas at 6.3x, renewable energy at 15.1x, and solar/wind at 18.5x. This indicates a premium for high-growth sectors amid the transition to cleaner energy.

APAC Energy Sector M&A & Valuation TLDR - 2026-07-12

APAC Energy Sector

- Key market drivers include rising oil prices and sustained investment in renewable energy, while inflation and regulatory scrutiny present challenges. Analysts express cautious optimism, noting that while higher oil prices can boost revenues, they also raise risks for economic stability.
- Investors should focus on geopolitical risks and consider increasing their exposure to renewable energy sectors, which are likely to benefit from long-term growth trends. Energy infrastructure companies should explore strategic acquisitions to enhance their capabilities in storage and transportation, positioning themselves for future growth.
