CONFIDENTIAL - FOR INTERNAL USE ONLY

1. 30-Second TL;DR

- Corniche Capital is expanding its nationwide build-to-suit program to meet industrial tenants' needs, focusing on speed-to-occupancy.
- Taiwan Semiconductor Manufacturing Company (TSM) has seen its stock double, reflecting strong demand for semiconductors, particularly in AI.
- The industrial sector shows cautious optimism, with average EV/EBITDA multiples around 10.2x, driven by tech advancements but tempered by regulatory and economic challenges.

2. 1-Minute TL;DR

- Corniche Capital's expansion of its build-to-suit program aims to address urgent needs in industrial real estate, particularly for sectors like data centers and advanced manufacturing, although specific deal sizes are not disclosed.
- TSM's stock performance highlights its critical role in the semiconductor supply chain, with a market cap of \$1.86 trillion and a revenue increase of 6.4% to \$35.9 billion.
- The industrial sector is characterized by cautious optimism, with average EV/EBITDA multiples at 10.2x. Key drivers include technological innovation and strong investment trends, while headwinds consist of regulatory scrutiny and economic volatility.

3. 2-Minute TL;DR

- Corniche Capital's recent expansion of its nationwide build-to-suit program is a strategic move to cater to industrial tenants' urgent needs for speed-to-occupancy and reliable power sources. This initiative positions Corniche as a key player in a market where traditional development timelines are increasingly untenable. While specific financials are not disclosed, the focus on entitled, shovel-ready land mitigates some risks associated with rapid expansion.
- TSM's stock has doubled since Giverny Capital's entry, reflecting robust demand for advanced semiconductors, particularly in AI and high-performance computing. With a market cap of \$1.86 trillion and a revenue increase of 6.4%, TSM's growth underscores its pivotal role in the tech supply chain,

despite risks from geopolitical tensions and market saturation.

- The industrial sector is navigating a landscape of cautious optimism, with average EV/EBITDA multiples around 10.2x. High-growth areas like aerospace and automotive are attracting investor interest, while traditional sectors face challenges. Key market drivers include technological advancements and strong investment trends, while regulatory scrutiny and economic uncertainties pose headwinds. Investors should focus on high-growth areas and stay informed on regulatory changes to capitalize on emerging opportunities.
