## *US Healthcare Sector*

Therapeutics by Processa Pharmaceuticals is a notable recent deal, aimed at enhancing its pipeline for immune-mediated diseases, with Phase 2 studies expected to begin in 2026.

- The average EV/EBITDA multiple for the Healthcare sector stands at 18.5x, with significant variations across subsectors: pharmaceuticals at 15.3x, biotech at 25.1x, medical devices at 12.8x, healthcare services at 14.7x, and digital health at 28.5x. This indicates a premium for high-growth sectors like biotech and digital health, while traditional areas face regulatory risks.

- Key market drivers include continuous technological advancements, particularly in AI and genomics, alongside robust venture capital investment in biotech and digital health. However, challenges such as regulatory scrutiny and economic uncertainties may impact healthcare spending and investment strategies.

- Stakeholders, including shareholders and employees, may experience varying impacts from M&A activities, with potential for value creation or dilution. The competitive landscape is expected to evolve, prompting companies to enhance their R&D efforts and pursue strategic partnerships.

- Moving forward, investors and bankers should prioritize high-growth areas, stay informed about regulatory developments, and leverage technology partnerships to navigate the evolving healthcare landscape effectively.
