## 1. 30-Second TL;DR

---

- The APAC Energy market is experiencing mixed sentiment, with oil and gas under pressure from geopolitical tensions, while renewable energy sectors thrive due to technological advancements.
- Average EV/EBITDA multiples are 8.5x, with oil and gas at 6.3x and renewable energy at 15.1x, indicating a premium for growth sectors.
- Investors should focus on high-growth areas like renewables and energy storage, while monitoring geopolitical risks and market volatility.

## 2. 1-Minute TL;DR

---

- The APAC Energy sector is navigating a complex landscape, with oil and gas facing challenges from geopolitical tensions, pushing Brent crude prices above \$92. In contrast, renewable energy is gaining traction due to rising investments and innovations.
- The average EV/EBITDA multiple for the sector is 8.5x, with oil and gas at 6.3x and renewable energy at 15.1x, reflecting a premium for growth sectors.
- Key drivers include geopolitical tensions and technological investments, while headwinds consist of market volatility and economic uncertainties.
- Investors should prioritize high-growth areas like renewable energy and energy storage, while being cautious with traditional oil and gas investments.

## 3. 2-Minute TL;DR

---

- The APAC Energy market is currently characterized by mixed sentiment, with the oil and gas subsector under pressure due to geopolitical tensions, particularly in the Middle East, leading to Brent crude prices exceeding \$92 a barrel. Conversely, the renewable energy sector is thriving, driven by increased investments and technological advancements.
- The average EV/EBITDA multiple for the Energy sector stands at 8.5x, with notable variations: oil and gas at 6.3x, renewable energy at 15.1x, utilities at 12.8x, and solar and wind at 18.5x. These multiples
