1. 30-Second TL;DR

- The APAC Energy market is currently influenced by geopolitical tensions, particularly in the Middle East, driving oil prices above \$92 per barrel.
- The average EV/EBITDA multiple for the Energy sector is 8.5x, with oil & gas at 6.3x and renewable energy at 15.1x, indicating a premium for growth sectors.
- Investors are advised to focus on high-growth areas like renewable energy while monitoring regulatory changes and technological advancements.

2. 1-Minute TL;DR

- The Energy sector is facing a complex landscape, with rising oil prices due to geopolitical tensions, particularly in the Middle East, pushing Brent crude above \$92 per barrel.
- The average EV/EBITDA multiple for the sector stands at 8.5x, with oil & gas at 6.3x and renewable energy at 15.1x, reflecting investor interest in high-growth areas.
- Key subsectors like renewable energy and energy storage are poised for growth, driven by technological advancements, while traditional utilities face challenges adapting to new energy sources.
- Investors should prioritize sectors with strong growth potential and remain vigilant about regulatory developments that could impact market valuations.

3. 2-Minute TL;DR

- The APAC Energy market is navigating a challenging environment, influenced by geopolitical tensions that have recently driven oil prices above \$92 per barrel. This has sparked increased investor interest in traditional energy sources, particularly in the oil and gas subsector, which is currently trading at an EV/EBITDA multiple of 6.3x.
- In contrast, the renewable energy sector is experiencing robust growth, with an average EV/EBITDA multiple of 15.1x, as technological advancements and rising demand for clean energy solutions drive investment. The energy infrastructure sector is also thriving, focusing on integrating renewable assets
