CONFIDENTIAL - FOR INTERNAL USE ONLY

1. 30-Second TL;DR

- The Energy sector is experiencing volatility due to geopolitical tensions and rising oil prices, with Brent crude surpassing \$100 per barrel.
- Oil & Gas faces challenges, while Renewable Energy and Solar & Wind sectors are thriving, with EV/EBITDA multiples at 6.3x and 18.5x respectively.
- Analysts predict continued M&A activity, particularly in renewables, as companies adapt to market dynamics and regulatory pressures.

2. 1-Minute TL;DR

- The Energy sector is currently volatile, influenced by geopolitical tensions and rising oil prices, with Brent crude recently exceeding \$100 per barrel.
- The Oil & Gas subsector is under pressure, trading at an EV/EBITDA multiple of 6.3x, while Renewable Energy is thriving with a multiple of 15.1x, and Solar & Wind at 18.5x.
- Utilities and energy infrastructure are adapting to integrate renewables but face regulatory challenges.
- Analysts foresee ongoing M&A activity, especially in renewable sectors, as companies seek to enhance capabilities and navigate market pressures.

3. 2-Minute TL;DR

- The Energy sector is navigating significant volatility, primarily due to geopolitical tensions, particularly in the Middle East, which have driven Brent crude oil prices above \$100 per barrel. This has raised concerns about inflation and consumer spending.
- The Oil & Gas subsector is struggling, with an EV/EBITDA multiple of 6.3x, while Renewable Energy is flourishing, boasting a multiple of 15.1x, and Solar & Wind at 18.5x, reflecting strong growth and investor interest.
- Utilities are investing in infrastructure to support renewable integration but face regulatory scrutiny,
