CONFIDENTIAL - FOR INTERNAL USE ONLY

1. 30-Second TL;DR

- The APAC Energy market is experiencing volatility due to geopolitical tensions, particularly between the U.S. and Iran, pushing oil prices above \$85 per barrel.
- The average EV/EBITDA multiple for the Energy sector is 8.5x, with oil and gas at 6.3x and renewable energy at 15.1x.
- Investors are advised to focus on high-growth areas like renewables while monitoring regulatory changes and economic uncertainties.

2. 1-Minute TL;DR

- The Energy sector is currently volatile, driven by geopolitical tensions, notably the U.S.-Iran conflict, which has led to rising oil prices, with Brent crude recently surpassing \$85 per barrel.
- The average EV/EBITDA multiple across the sector is 8.5x, with oil and gas trading at 6.3x and renewable energy at a premium of 15.1x.
- Key subsectors like renewable energy, utilities, and energy infrastructure are adapting to market dynamics, with significant investments in technology and sustainability.
- Investors should prioritize high-growth sectors and stay informed about regulatory developments and economic conditions that could impact energy demand.

3. 2-Minute TL;DR

- The APAC Energy market is currently facing significant volatility, primarily due to geopolitical tensions, especially the escalating conflict between the U.S. and Iran, which has pushed Brent crude prices above \$85 per barrel. This has created a mixed sentiment across subsectors, with oil and gas companies like ExxonMobil and Chevron seeing stock price increases as they anticipate higher revenues.
- The average EV/EBITDA multiple for the Energy sector stands at 8.5x, with notable variations: oil and gas at 6.3x, renewable energy at 15.1x, and solar/wind at 18.5x, indicating a premium for high-growth
